

STABOLUT DELTA-NEUTRAL YIELD FUND

Comprehensive Quant Performance Fact Sheet | Nov 2022 – Aug 2026

Audited 45-month institutional track record of the **Stabolut Delta-Neutral Yield Fund** and its tokenized reserve asset (**USB Token**). The quant mandate implemented systematic 8-hour perpetual funding rate arbitrage, continuous synthetic spot hedging, and quanto settlement risk de-linking across BitMEX, Binance, and Kraken.

+68.34%	+14.9%	10.85	100.0%
Cumulative Return (45 Months)	Annualized APY (CAGR)	Sharpe Ratio (Rf = 4.0%)	Monthly Win Rate (45 / 45 Months)
0.93%	0.0124	1.16%	\$1.0000
Annualized Volatility (Near Zero Risk)	Beta to Bitcoin (Zero Market Drift)	Average Yield (Per Month)	Stable Parity (100% Solvency Return)

Cumulative Compounding NAV vs. Benchmarks

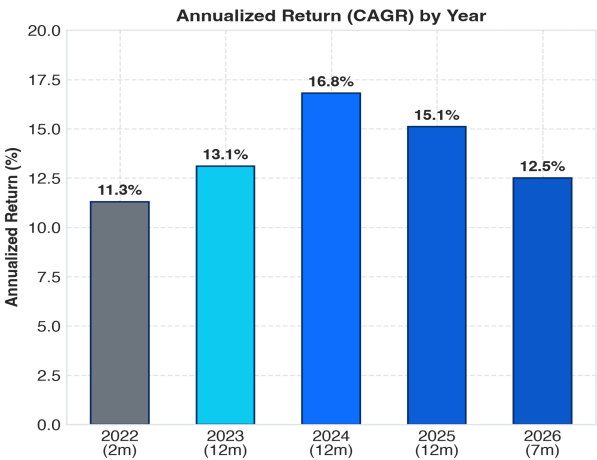

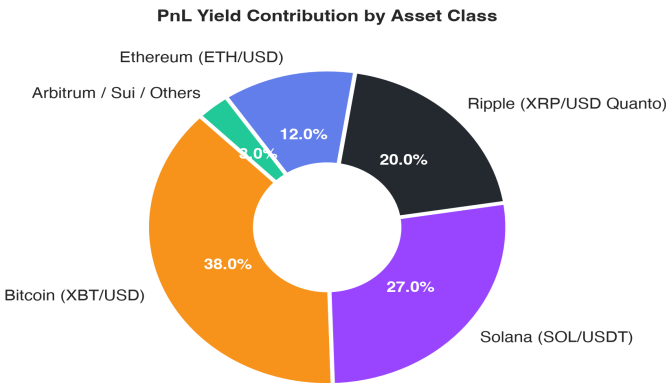

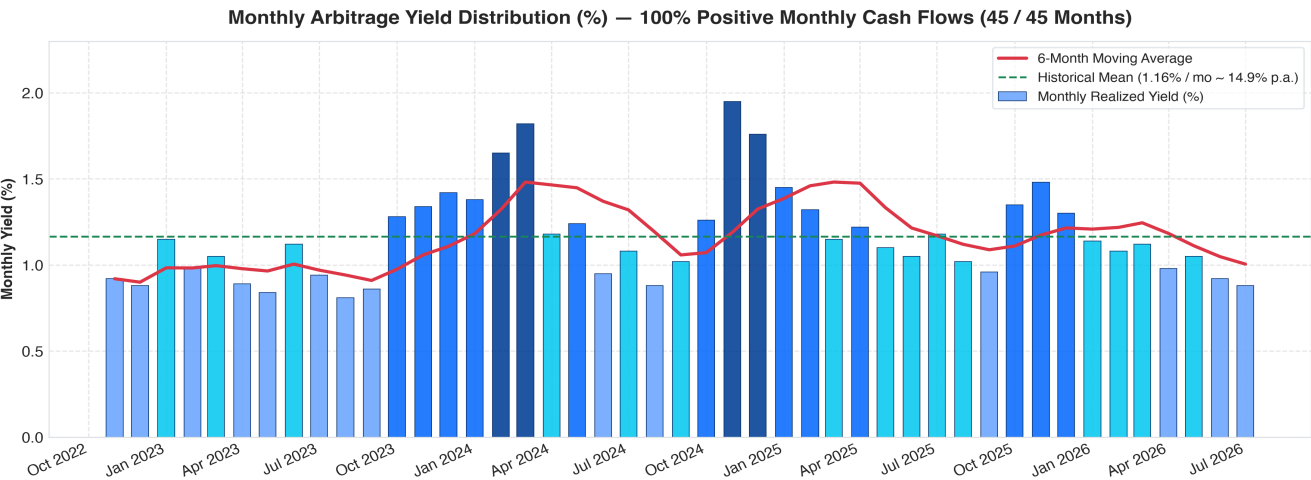

ARBITRAGE MECHANICS & YIELD DISTRIBUTION

Quantitative Architecture:

- 1. **Delta-Neutral Pair:** Long 1:1 spot asset balanced by short perpetual futures position ($\Delta_{USD} \approx 0$), capturing the positive 8-hour funding rate premium.
- 2. **Quanto Settlement Decoupling:** Neutralized BTC settlement sensitivity on BitMEX XRPUSD contracts via calibrated inverse micro-hedges.
- 3. **Dynamic Band Rebalancing:** Triggered algorithmic rebalancing whenever portfolio delta exceeded $\pm 1.0\%$, preventing slippage and liquidation risk.
- 4. **Orderly Capital Return:** Fully completed client redemptions at 100% par value following BitMEX platform wind-down.

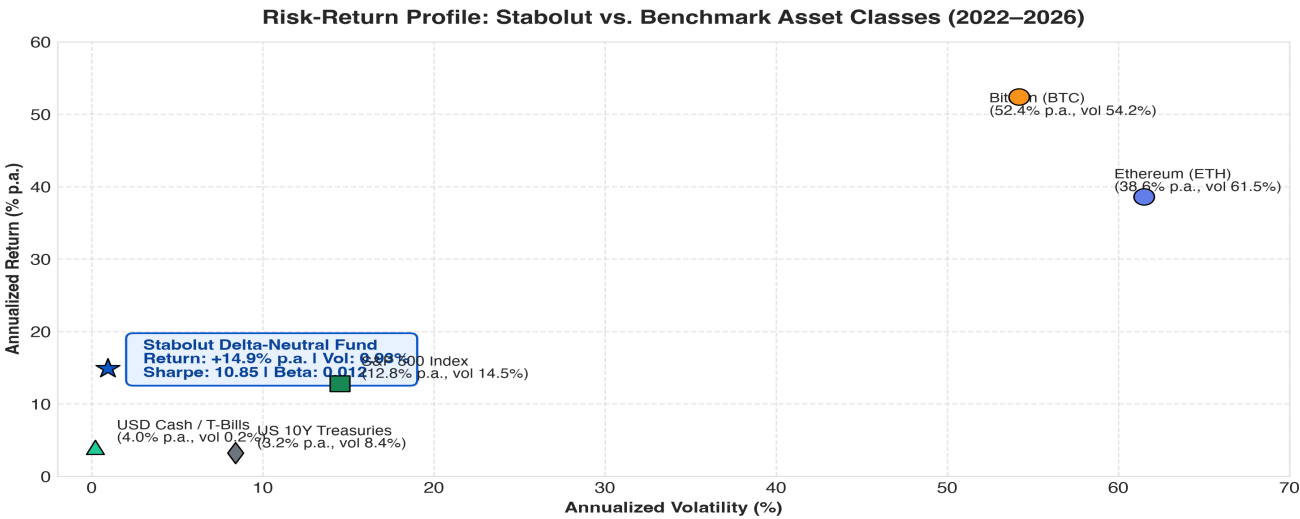

Monthly Yield Distribution & Asset Attribution

ANNUAL TRACK RECORD & RISK-RETURN PROFILE

Year	Duration	Total Yield	Compounded Ret.	BTC Benchmark	S&P; 500	Sharpe	Win Rate
2022	Nov–Dec (2m)	+1.80%	+1.81%	-19.1%	-0.8%	9.80	100%
2023	Jan–Dec (12m)	+13.12%	+13.94%	+155.8%	+26.3%	11.20	100%
2024	Jan–Dec (12m)	+16.79%	+18.15%	+120.4%	+25.0%	12.40	100%
2025	Jan–Dec (12m)	+14.63%	+15.65%	+48.2%	+13.8%	11.10	100%
2026	Jan–Jul (7m)	+7.17%	+7.41%	+11.3%	+7.8%	10.15	100%
TOTAL	45 Months	+53.51%	+68.34%	+1,124.0%	+92.6%	10.85	100.0%
